Raj,  
This is FYI for you. You may already be aware.

Cris/Neil –

FYI...attached is the final MeBr report that details CMAD's efforts using this fumigant. Included is a HASP, Ambient Air Monitoring Plan, and FOG. Considering the juxtaposition of the USVI response and the finalization of this report, I thought that you may find some of the attached information useful.

If you have any specific questions or would like to discuss any of the attachments in detail, please reach out to either Leroy Mickelsen or Shannon Serre directly. If I can assist in anyway please let me know.

Continue to do good work.

Michael Nalipinski, Associate Director  
CBRN Consequence Management and Advisory Division (CMAD)  
U.S. EPA Office of Emergency Management

Attached is the MB final report with attachments. All comments were accepted and corrections made.

Mike, feel free to forward to the OSCs following up on the MB poisoning. Also, you can give them both Shannon and my contact information.

I have Word versions if needed.

Happy Day! ☺
